

Summer 2022-

Add an Internship to your 5-week summer program!

Students participating in the summer 2022 5-week program have an exciting option, for an additional \$3000 students can complete a three-hour internship while living at the Manor. We will offer the students personalized attention in creating their placement and helping with questions throughout the process.

1. Additional expenses for students are the Student Visa costs and any transportation costs associated with the internship.
2. The dates for the internship are during the second summer session.
3. During this time, room and a 12 meal a week meal plan at the Manor are included in the fee as well as the three-credit hour course.

Students wishing to complete this internship in the summer will need to complete the summer internship application in addition to the 5-week application. Once completed, our internship team in the UK will reach out to help with your placement.
